INFRASTRUCTURE

- Backward Integration – In-house dyeing & weaving for full process control with integrated dyeing laboratory
- CMT Under One Roof – Cutting, making & packing with 500+ stitching machines and 150+ overlock/folding machines
- Advanced Finishing – Tubular & compaction technology for premium fabric stability, Raising and washing machines
- Precision QC – In-house fabric inspection with latest high-tech machines
- End-to-End Reliability – Steam pressing, cutting, and packing in-house for speed & quality

Vision

To redefine India's role in global apparel by becoming the most reliable, sustainable, and technology-driven manufacturing partner for leading value retailers

Mission

We achieve this by combining decades of textile expertise with modern processes, transparent partnerships, and eco-conscious operations – delivering garments at scale with speed, quality, and consistency.

Goals

Our goal is to scale into a \$100M sustainable garment exporter within the next decade, partnering with leading global retailers while continuously expanding capacity, efficiency, and eco-conscious practices.
